Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

A proper terminal disclaimer is acknowledged.

The amended formula IV at page 2 of the specification and in claim 39 is confusing since they are not in proper forms, the underline for added group is missing. Submission of the whole clean formula is suggested in order to avoid confusion.

Spelling correction of "sulphate" to "sulfate" in claims 12, 14 and 17 is needed in order to have consistency.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16, 32 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 32 and 41 are redundant in view of the amended claims 30 and 39, and cancellation is suggested. The recited phosphate of claim 16 lacks an antecedent basis

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-47 are rejected under 35 U.S.C. 102(e) as anticipated by Chen et al (US 6,444,747).

Rejection is maintained. The statement (US Pat. 6,444,747 was owned by the assignee of the present invention) does not overcome the rejection of anticipation contrary to applicant's assertion. Concrete and cement taught by Chen et al encompass the instant Portland cement inherently to one skilled in the building art..

Claims 1, 5-12, 18-20, 22-24, 26-28, 30 and 32-37 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 02/083592.

WO teaches slurry compositions comprising the instant copolymers of acrylic acid and polyethyleneglycol monoallyl ether sulfate (page 2, lines 14-15) and gypsum (page 1, line 26). Said polyethyleneglycol encompasses the instant repeating unit and molecular weight thereof inherently. Thus, the instant invention lacks novelty.
